

Skyline Access Rope Specifications & Technical Data

Manufactured from high tenacity polyester for rope access, rescue & sport use.

Diameter	Weight (lb/100')	MBS	Elongation (at 10% of MBS)	Colour	Available Packages	PART #
10mm	5.1lb	5,000lbf	2.5%	Blue/Black	183m (600 feet)	09-100
11mm	6.5lb	6,200lbf	3%	Orange/Black	183m (600 feet)	09-111
13mm	8.5lb	9,000lbf	2.5%	Red/Black	183m (600 feet)	09-113

*Rated breaking strength is the optimum strength, achieved under laboratory conditions, in accordance with prescribed test procedures, on a new rope, pulling at a slow, steady rate in a straight line.

Applications

- Rope access
- Rescue
- Sport

Features

- High strength, abrasion resistant & durable
- Designed to minimize sheath slippage
- Static

Fiber Specifications

- UV resistant
- Excellent microbial resistance
- Melts at 254°C

Specifications may change without notice. We recommend referring to cancord.com for the most up to date information, or requesting a current specification sheet when ordering.

Custom colours & lengths available on a made to order basis. Please contact info@cancord.com for details.
